Improvements

- Image is not reloaded anymore if it was saved in Nik Collection standalone and user can continue modification until plugin window is closed
- Color ranges stay fixed in the right panel in Nik Dfine

Bug Fixes

- Applying of presets in Nik Viveza with Control Points leads to memory overuse
- Presets from Nik Collection plugins are not saved in Affinity AppStore
- Nik Collection plugins launch as standalone or freeze from Affinity 2.1 (after upgrade from Affinity 2.0)
- Nik Dfine masks are not visible on rotated images
- Wrong Adobe Photoshop version is displayed in Nik Collection installer and uninstaller
- A new denoising profile with the same name created in Nik Dfine on attempt to update existing profile
- Focus remains on text field instead of being on Control Point when user clicks on Control Point in the preview
- Nik Collection Pallet width changes if moved to another monitor with a different scale
- There is no "Last edit" in Nik Dfine filter menu
- Color Ranges values might reset if switching from color to grayscale image in Nik Dfine

New features in Nik Collection 6

- **Nik Dfine: Completely new Interface for improved User Experience**

- **U Point Technology™ enhancements for local adjustments:**
 - **Control Lines** add flexibility when making broad adjustments, bringing the power of Control Points to linear gradients
 - **Control Point Diffusion** lets you alter the strength and style of adjustments
 - **Show or hide local adjustments directly in the preview** for greater simplicity
 - **Inverse mask** reverses the mask of selected control points or control lines
- **Nik Perspective new features and enhancements:**
 - **ReShape tool** offers further control over composition by letting you distort parts of the image using a customizable grid overlay
 - **Symmetry feature** lets you flip images vertically or horizontally
 - **Guidelines tool** let you position vertical and horizontal lines to help with perspective corrections
 - **File browsing** now lets you access a tree hierarchy of computer folders and drives
 - New **optics modules** for automatic geometric corrections

- **New HSL feature in Nik Color Efex** for deeper, more accurate, control of color and tone. The HSL feature lets you selectively correct colors using 8 color channels, a global channel, and 4 sliders to alter hue, saturation, luminance and uniformity
- **Convert** Adobe Photoshop **layer to Smart Object from within the Nik Collection plugins** for a non-destructive, reversible workflow
- **Select one of your last 15 Nik Collection edits** and apply it again in a single click
- **Presets** can now be **searched for by name** so you can instantly find your favorite edits
- **Affinity Photo** is now automatically detected during **installation**

Known Issues and Limitations

- U Point™ technology enhancements, smart object conversion, last 15 Nik Collection edits and preset search features are available for all software in Nik Collection 6.0 except Nik Sharpener and Nik HDR Efex.
It will be made available for Nik Sharpener in Nik Collection 6.2 and for Nik HDR Efex in Nik Collection 6.3 planned for release Summer 2023.
- Selective Palette preferences do not apply to Nik Perspective
